

## Declaration of the presence of PFAS.

Per-and polyfluoroalkyl substances (PFAS) and components with PFAS are used for their unique properties, such as electric insulation, wear resistance, low friction, and resistance to chemicals, and only in the amounts necessary for their function and can be found in a variety of products, typically electric wire insulation, bearings and sealings, lubricants, coatings and adhesives or be a part of other polymers.

VOX Power Ltd monitors all regulations for PFAS such as:

- Toxic Substances Control Act (TSCA Section 8(a)(7)) PFAS substances.
- Proposition 65 (Safe Drinking Water and Toxic Enforcement Act, 1986) of California, listing PFOA and PFOS as causing developmental defects and requiring warning labels under certain conditions.
- EU directives regulating PFAS substances in the frame of REACH and POP directives restricting e.g. PFOA, PFHxS, PFOS, PFCAs, and their derivatives.
- Canada CEPA 71(b)

VOX Power Ltd declares that:

The components and articles used in the construction of the product(s) listed do contain PFAS substances, primarily in the form of high molecular weight fluoropolymers which based on current current knowledge are not expected to result in significant PFAS exposure under normal conditions. Under normal use, these fluoropolymers are not expected to pose significant risk during the life cycle of VOX Power Ltd products.

The specified product contains the following PFAS:

Substance Name	CAS Number	Product containing PFAS
Polytetrafluoroethylene (PTFE)	9002-84-0	NEVO600 Front End, NEVO1200 Front End, NEVO Modules, VCCM Modules, EIRE300
1-Hexene, 3,3,4,4,5,5,6,6,6-nonafluoro-, polymer with ethene and 1,1,2,2-tetrafluoroethene (ETFE)	68258-85-5	VCCM600 Front End
1-Propene, 1,1,2,3,3,3-hexafluoro-, oxidized, polymerised.	69991-67-9	EIRE300
Ethene, 1,1-difluoro-, homopolymer (PVDF)	24937-79-9	NEVO600 Front End
Siloxanes and Silicones, Me 3,3,3-trifluoropropyl	63148-56-1	NEVO Modules, VCCM Modules, VCCS300, VCCR300, EIRE300

VOX Power Ltd believes that the information it provides above is accurate. The provided information is based upon data obtained from ongoing due diligence concerning components and materials provided by third party suppliers. VOX Power Ltd does not routinely analyse components or raw materials for the presence of PFAS substances. VOX Power Ltd provides such information "AS IS", without any express or implied warranty of any kind. VOX Power Ltd reserves the right to update and modify this declaration, as it believes necessary or appropriate.

This declaration covers all PFAS material currently identified through supplier delarations and internal due diligence processes at the date of issue. PFAS regulated under the EU POP Directive are covered by the POP declaration for the respective products. Additional PFAS materials that have not been intentionally added may be present as residuals or impurities from upstream manufacturing processes. For further information please contact VOX Power Environmental Compliance for more details.
