

DECLARATION OF COMPLIANCE

Canada Prohibition of Certain Toxic Substances Regulations, 2025 (SOR/2025-270)

1. Company Information

Company Name : Vox Power Ltd
Physical Address : Unit 2, Red Cow Interchange Estate, Ballymount, Dublin 22, D22 Y8H2
Contact : Environmental Compliance
Email Address : environmental@vox-power.com
Phone Number : +353 1 459 1161

2. Product Scope

This declaration applies to the following Vox Power product families and associated accessories supplied to the Canadian market:

- NEVO Series
- VCCM Series
- VCCS Series
- VCCR Series
- EIRE Series

3. Regulatory Basis

Vox Power Ltd has reviewed the applicability of the Canadian Prohibition of Certain Toxic Substances Regulations, 2025 (SOR/2025-270) to the products identified above.

The Regulations apply to specified toxic substances listed in Schedule 1 and to products containing those substances, subject to the exclusions, incidental-presence provisions and authorised activities provided within the Regulations.

Vox Power's assessment is based upon component and material compliance information obtained from its supply chain and maintained within its environmental compliance management system.

4. Compliance Assessment

Vox Power has assessed the products within the scope of this declaration against the requirements of SOR/2025-270 based upon the component and material information currently available from our supply chain.

The assessment includes consideration, where applicable, of regulated substances including:

- Perfluorooctane sulfonate (PFOS), its salts and specified precursor compounds
- Perfluorooctanoic acid (PFOA), its salts and specified precursor compounds
- Long-chain perfluorocarboxylic acids (LC-PFCAs), their salts and specified precursor compounds
- Hexabromocyclododecane (HBCD)
- Polybrominated diphenyl ethers (PBDEs)
- Dechlorane Plus (DP)
- Decabromodiphenyl ethane (DBDPE)
- Other substances listed in Schedule 1 where relevant to the materials and components used within Vox Power products

For each applicable substance, Vox Power considers the available supplier material information together with the relevant prohibition, incidental-presence threshold, authorised activity or transitional provision under the Regulations.

Based upon this assessment, Vox Power considers the products within the scope of this declaration eligible to be supplied to the Canadian market in accordance with SOR/2025-270, subject to the specific DBDPE authorised activity described below.

5. Decabromodiphenyl Ethane (DBDPE)

Certain components or materials incorporated within Vox Power products may contain Decabromodiphenyl ethane (DBDPE).

Under Schedule 1, item 25(5) of SOR/2025-270, the manufacture or import of manufactured items containing DBDPE is an authorised activity for 15 years following publication of the Regulations, corresponding to 1 January 2041 under Environment and Climate Change Canada's published guidance.

Vox Power products are finished manufactured items having a specific physical form and function. Where DBDPE is present within components or materials incorporated in such products, Vox Power relies upon this authorised activity for the applicable manufacture or import of those products into Canada.

This authorised activity does not require a temporary permit. Environment and Climate Change Canada also confirms that the ongoing use and sale of manufactured items containing DBDPE is authorised without a time limitation under the applicable Schedule 1 provision.

Vox Power will continue to monitor DBDPE use within its supply chain and the applicable regulatory requirements ahead of the expiry of the authorised activity.

6. Supporting Evidence and Continuing Review

Vox Power maintains environmental compliance information for the components and materials used within its products. Supporting information may include:

- manufacturer and supplier compliance declarations;
- full material declarations and component material data where available;
- substance-specific declarations;
- environmental compliance database records; and
- applicable regulatory exemptions and authorised activities.

Supplier information and regulatory requirements are subject to continuing review. Where updated information identifies a change in the regulatory status of a component or material, Vox Power will assess the impact on the affected products and take appropriate action.

Vox Power maintains supporting records in accordance with its environmental compliance and document-control processes.

7. Declaration

Based upon the information currently available and the assessment described above, Vox Power considers the products within the scope of this declaration to comply with the applicable requirements of the Prohibition of Certain Toxic Substances Regulations, 2025 (SOR/2025-270), including where relevant through the authorised activities expressly provided for within those Regulations.
